

GT-77-ATV Electric Broadcaster

The model GT-77-ATV eliminates hours of time spent hand-seeding. Its unique vibrating style agitator ensures the Sure-Feed of material being spread, even small or light seed varieties.

The maneuverability of today's ATVs or UTVs will leave little or no tracks on your field or lawn, and will allow you to spread in hard to reach locations.

The adjustable seed gate design allows you to spread a wide variety of materials. It also uses a centering plate system for adjust the throw pattern.

The GT-77-ATV uses a 12-volt motor (low amp draw). A wiring harness equipped with a fuse for motor protection and quick coupler for easy attachment and removal. A four-bladed plastic fan ensures an even pattern spread. The heavy duty grey-iron base and galvanized hopper are rugged enough for years of trouble-free operation.
