

# CL1 Disc Chain

**Unit Weight: 25lbs**

**Total Weight (per foot): 47lb/ft**

**Degree of Concave: 35 degrees**

**Diameter: 13"**

**Spacing: 7"**

## The most versatile of the Kelly Disc Chains

The CL1 Disc Chain is a concave disc made from hard-wearing cast steel alloy with a hook and eye for linking together. These individual links make maintenance and servicing simple.

CL1 Disc Chains are the perfect tool for residue management, working at a constant, shallow depth for weed control and levelling soil, while preserving precious moisture and soil health to give farmers a perfect and precise seedbed.

Using less fuel, labour and chemicals, the CL1 Disc Chain provides a cost effective way to prepare a seedbed and improve your bottom line.
