**EXCAVATOR & WHEEL LOADER ATTACHMENTS**

# ABOUT

**NM Attachments** is a custom excavator and wheel loader attachment manufacturer. We specialize in building heavy-duty attachments that perform in extreme conditions and stand up to the use cases for heavy machinery.

For over ten years, **NM Attachments** has been designing, optimizing, and building excavator attachments. From our experience working closely with customers to solve unique application challenges, our team has streamlined the manufacturing process. This experience means that our customers can get a highly customized product when standard options do not suffice.

**NM Attachments** understands that in many cases, longer lead times may not work conveniently with real-world demands of the business. Therefore, we ensure our lead times are kept to a minimum.

Our goal is to build heavy-duty attachments that empower our customers to be able to focus on what creates value for - day in and day out.

## EXCAVATOR ATTACHMENTS

Tooth Buckets, Extreme Duty Rock Buckets,  
Pin Grabber Buckets ..... 1  
Trapezoid Buckets, Ditching Buckets,  
Hydraulic-Tilt Ditching Buckets ..... 2  
Skeleton Buckets, Hybrid Rake,  
Root Rakes. .... 3  
Pin Grab Couplers, Wedge Style Couplers,  
Frost Rippers. .... 4  
Thumbs - Hydraulic Stick Pivot, Thumbs - Hydraulic Weld-On,  
Thumbs - Mechanical Weld-On. .... 5  
Thumbs - Pro-Link, Demolition Grapples,  
Excavator Forks ..... 6  
Chuck Blade, Concrete Pulverizers,  
Concrete Slab Bucket ..... 7  
Rotating Log Grapples, Rotating Bypass Grapple,  
Excavator to Skid Steer Adapter. .... 8

## WHEEL LOADER ATTACHMENTS

General Purpose Buckets, Light Material/ Snow Bucket,  
Wood Chip Bucket. .... 9  
High Dump Buckets, Snow Basket,  
Feedlot Grapple Buckets ..... 10  
Wheel Loader Hydraulic Forks, Wheel Loader Forks,  
Skeleton Buckets ..... 11  
Root Rake Grapple, Pipe Grapple. .... 12  
CONTACT INFORMATION. .... 13

# EXCAVATOR ATTACHMENTS

## TOOTH BUCKETS

Tooth Buckets are used in sand, gravel, and clay and are particularly effective for trenching gas, water lines, and more.

## EXTREME DUTY ROCK BUCKETS

Extreme duty rock buckets are built to withstand the extreme service conditions of road building, mining, and quarry applications.

## PIN GRABBER BUCKETS

Pin Grabber Buckets is designed with the pin recessed into the bucket which gives the operator the convenience of using a pin grab coupler without losing breakout force.

# EXCAVATOR ATTACHMENTS

## TRAPEZOID BUCKETS

With the trapezoid bucket, you can lower your cost by reducing the amount of backfill needed. Ideal for pipeline and trenching applications. This will reduce the cost of transportation and backfill material.

## DITCHING BUCKETS

Ditching buckets are used in slope work, ditching, grading, back-filling, land clearing, or any high volume, light material handling.

## HYDRAULIC-TILT DITCHING BUCKETS

Hydraulic Ditching Buckets take the strengths of standard ditching buckets and add the versatility of a 45 degrees tilt function on each side.

# EXCAVATOR ATTACHMENTS

## SKELETON BUCKETS

Skeleton Buckets are used to remove rocks and debris while sifting through the soil.

## HYBRID RAKE

The hybrid rake gives you the options of a root rake plus you can now sift out the unwanted rocks and debris while leaving the soil behind.

## ROOT RAKES

Root Rakes are designed for moving and loading the unwanted brush, trees, stumps, and more. Root rakes are ideal for fence line and orchard removal.

# EXCAVATOR ATTACHMENTS

## PIN GRAB COUPLERS

Pin Grab couplers are a great tool to change attachments quickly and efficiently.

## WEDGE STYLE COUPLERS

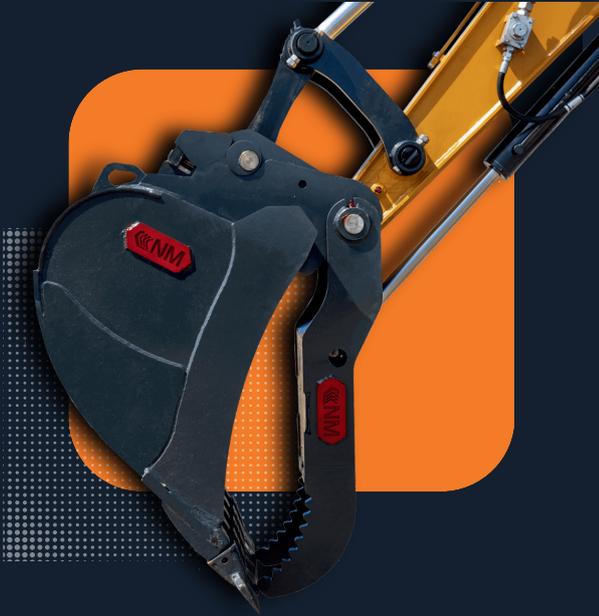

NM wedge style couplers give you the right tool you need to change buckets fast and easy.

## FROST RIPPERS

Frost Rippers are attachments for serious prying and ripping, particularly for working in frost or rock.

# EXCAVATOR ATTACHMENTS

## THUMBS – HYDRAULIC STICK PIVOT

Stick Pivot thumbs pivot from the main bucket pin and give you a constant grip on the load when rotating the bucket.

## THUMBS – HYDRAULIC WELD-ON

Excavator Thumbs are used in various applications, such as land clearing, demolition, material handling, and much more

## THUMBS – MECHANICAL WELD-ON

Excavator Thumbs are used in various applications, such as land clearing, demolition, material handling, and much more.

# EXCAVATOR ATTACHMENTS

## THUMBS – PRO-LINK

NM Pro-link thumbs give you up to 180 degrees of rotation which allows you to pick and grab objects closer to your machine. This makes it much easier and less repositioning of the machine which will increase your cycle time.

## DEMOLITION GRAPPLES

These demolition grapples are designed for severe demolition, rock handling, and waste handling applications. This attachment will be a great tool to add to your excavator toolbox.

## EXCAVATOR FORKS

Excavator Forks will give you more reach for loading and unloading materials.

# EXCAVATOR ATTACHMENTS

## CHUCK BLADE

If you have a problem with sticky, wet soil that doesn't want to dump clean this is the right attachment you need.

## CONCRETE PULVERIZERS

The concrete Pulverizer is a heavy-duty design that will crush concrete all day long. No extra hydraulics needed. Available in multiple tine configurations. Multiple position bracket.

## CONCRETE SLAB BUCKET

Concrete Slab Buckets are the right tool for handling concrete blocks and broken slabs. Slab buckets are built to withstand severe prying and ripping applications.

# EXCAVATOR ATTACHMENTS

## ROTATING LOG GRAPPLES

The NM rotating grapples are designed for operator efficiency while handling logs.

## ROTATING BYPASS GRAPPLE

The NM rotating Bypass grapples are designed for operator efficiency and can be used in multiple applications such as demolition, cleanup, retaining wall building, handling logs Etc.

## EXCAVATOR TO SKID STEER ADAPTER

This adapter allows you to attach universal Skid Steer attachments to your excavator.

# WHEEL LOADER ATTACHMENTS

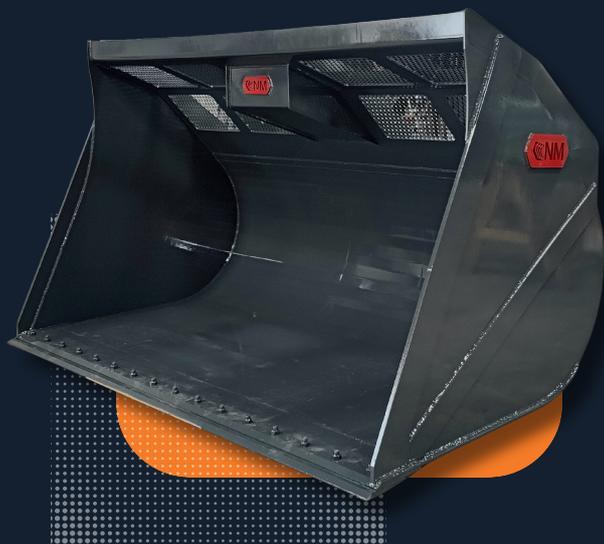

## GENERAL PURPOSE BUCKETS

General Purpose Buckets are used for stockpiling and material handling operations and designed to dig and handle materials that weigh up to 3000 lbs per cubic yard in density.

## LIGHT MATERIAL/ SNOW BUCKET

Light material buckets offer higher capacity than general-purpose buckets making them ideal for lifting snow, mulch, or other light materials.

## WOOD CHIP BUCKET

Woodchip Buckets are specially designed for handling of sawdust and wood chips.

# WHEEL LOADER ATTACHMENTS

## HIGH DUMP BUCKETS

The high dump bucket has a bottom pivot point that allows the operator to dump loads with a higher clearance when dumping a load.

## SNOW BASKET

For extra high volume and high visibility snow removal.

## FEEDLOT GRAPPLE BUCKETS

The NM Feedlot Grapple Bucket is designed for handling bales & silage. The dual grapples give you a steady bite on an uneven load.

# WHEEL LOADER ATTACHMENTS

## WHEEL LOADER HYDRAULIC FORKS

The Hydraulic Tine Positioner forks are used in everyday lifting and moving applications with the ability to position the tines from the seat of your cab.

## WHEEL LOADER FORKS

Loader Forks are used in everyday standard duty pallet applications.

## SKELETON BUCKETS

The NM Loader skeleton bucket allows you to sift through the rocks and leave the dirt behind, giving you the efficiency that you need to get the job done.

# WHEEL LOADER ATTACHMENTS

## ROOT RAKE GRAPPLE

Root Rake Grapples are designed to clear scrub and brush while reducing the amount of soil collected. The top clamp lets you take a bigger bite giving you more efficiency and reducing cost.

## PIPE GRAPPLE

Loader Pipe Grapples are used in oil and gas industries where pipe handling is a key role on the job. The NM pipe grapple is built with high visibility design that increases operator comfort and efficiency.
